To Whom It May Concern,

We have had Abate of Wisconsin presenting their Share the Road program to our classroom students for nearly a year. During this time they have been a joy to have for both our students and for our school.

The Share the Road program is a great way in teaching students about the situations motorcyclists deal with everyday and how what the students will do in a car impacts motorcycle riders. This presentation helps reiterate many key driving concepts that are taught to the students but with a fresh and outside approach. The presenters are very knowledgeable on their subject matter, being able to answer any questions, and do a great job of intertwining it into driver's education. ABATE is always working to make the presentations better, in getting students more involved and are accommodating to our time frames and curriculum.

With more and more people getting on motorcycles, many of our students turning to mopeds as their first form of transportation, and with the great work that went into putting together this presentation, I highly recommend the Share the Road program to other schools. I feel this program is another great way to help make our roadways safer for everyone that uses them.

Sincerely,

Joseph Olow
